

AB-TEYMOUR FIELD

Location of the Ab-Teymour Field

.onshore
.heavy
Operator:
.NISOC

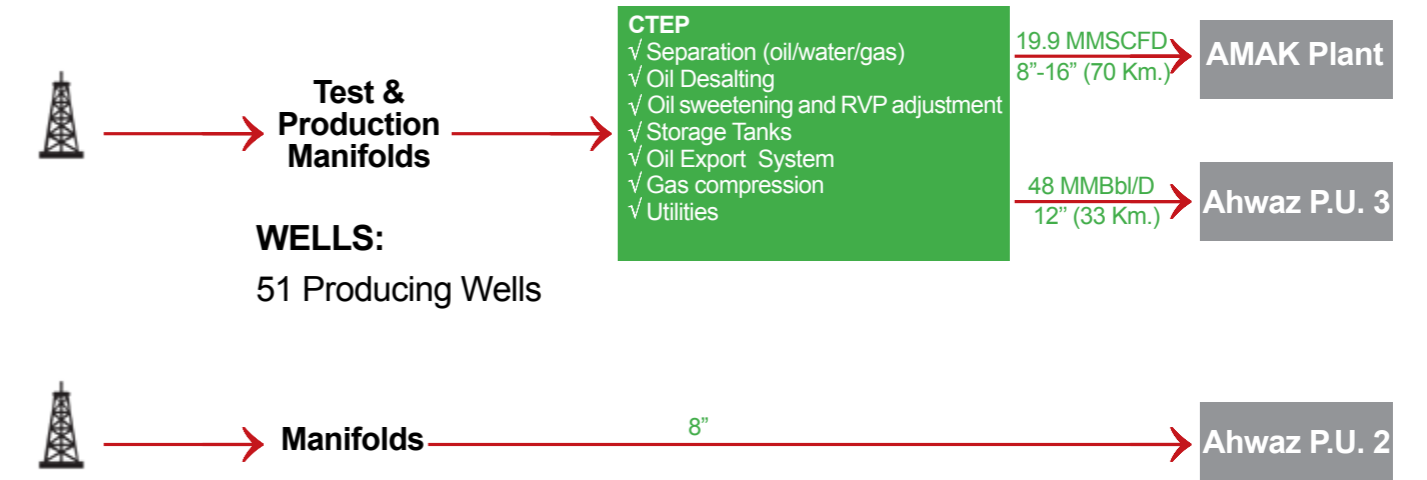

Ab-Teymour field is located 25 km from Ahwaz city and between Susangerd and Mansuri fields.

General specifications

Current Production:

48 MSTB/D (Overall capacity of 55 MSTB/D)

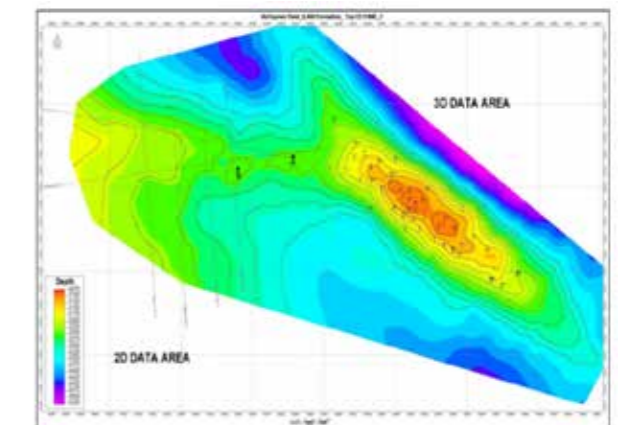

WELLS:
51 Producing Wells

WELLS:
8 East Karun Producing Wells

Considering the reservoir performance, it is suggested that new studies with the aim of determining optimum production mechanism, possibility of using EOR and IOR methods (such as gas lift, installation of down-hole pumps and hydraulic fracturing) being investigated.

A comprehensive study of the field has been done by Research Institute of Petroleum Industry (RIPI) recently.

Disc. year	Prod. init. year	Dim. kmxkm	Seismic Data	No. Wells	Formation	API Degrees
1967	1991	23.5x6.5	3D	36 (29 prod.) 50 (22 prod.)	Ilam Sarvak	22.5 20

Field	STOIP MMBbl	Cumulative Production MMBbl	Current Production MBbl/d	Total Estimated Production MBbl/d
